Join Sage City Live roundtable host:
Steve Collins

With a bachelor's degree in accounting, Steve Collins started his career in traditional accounting roles. But in 1997 he had the chance to put his accounting knowledge to work in the IT world by providing technical support to Sage 50 Accounting—U.S. Edition (formerly Peachtree) users, and that's what he's been doing ever since.

In 2008, Steve started IQ Accounting Solutions LLC., where, as a Sage Solution Provider certified in Sage 50 Accounting, he focuses on helping small businesses get the most out of their accounting software through proper software selection, training, setup, and ongoing support. He also publishes a monthly email newsletter with Sage 50 Accounting and Excel tips.

In his free time, Steve enjoys cooking, listening to big band music, and pretending he knows what he's doing on home improvement projects.
